

ACTION RECOILPAD TESTIMONIALS

Action Shoulder Harness

Action Products' recoil reducing strap-on shoulder harness is phenomenal in its ability to reduce felt recoil of hard hitting magnum rifles and shotguns.

This shoulder harness is made fully adjustable to fit every body size from the biggest man to small child. The shoulder harnesses' straps, when adjusted properly, lock together with a simple quick detachable latch. The pad itself being only ¼ " thick is made of material that reduces felt recoil of heavy kicking firearms by over 60%.

During our tests with Action Products' shoulder harness we found recoil from a 300 Win Mag to be reduced to approximately that of a 243 Win. This strap-on pad created a much more pleasurable shooting condition in regards to the number of rounds that could be comfortably fired in one session.

When I go hunting ground squirrels the gun shock will give me bruises on my arm. Then I tried "Kick Killer®" shooting clay pigeons and I didn't even feel the shock. I had no bruises or sore muscles. I now have this product and will use it always!

Last week it was my pleasure to try your “Kick Killer” Shooting Vest with the Akton® shock absorbing pad. A sample was provided to me by Mr. Webster Wright of Annapolis, MD. This is the first product of this kind I have tried in 30 years of participating in the shooting sports *that really works!* And I should say, I’ve tried them all.

The first time I used it was during a bench-rest session. I could not believe how effective it was in absorbing recoil. I also loaned it to two other shooters that day and they too were amazed. Next, I wore it to a two day off-hand match. Usually, after a two day match my shoulder will show some soreness- not so using your shooting vest. *There was not one bit of soreness the next day.*

As a testament to the effectiveness of your products, I would like to place an order for three of your very excellent Akton® “Kick Killer” shoulder pads in the T-Shirt Model. Please send one large and two medium. Again, it’s a pleasure to find a product promoting effective recoil absorption that actually does!

Sincerely,

William N. Welch

I sure appreciate the time and effort you went to help me get the perfect Kick Killer recoil butt pad for the Ruger 416 Rigby rifle I recently took to Botswana to hunt Cape Buffalo.

The rawhide lace-up type gave the rifle a truly classic look and the polymer cushion significantly reduced the recoil of this heavy caliber. After putting the Kick Killer over the standard recoil pad, the rifle was almost a pleasure to shoot. I became so comfortable with the rifle, and consequently able to shoot it very quickly and accurately, that I later used it to hunt Kudu and Warthog. I also took a 30-06 Ruger with one of your Kick Killers for plains game. The reduced recoil helped me shoot much better off of the shooting sticks. Thanks again for your help.

Best Regards,

Joe Lawton

Firstly, I would like you to know that I have *never* done this before. I am not in the habit of endorsing any type of product. I must, however, say I am making an exception for a product I recently purchased from your company.

In my life I have seen many sales people and heard all of their glowing promotional pitches. Conversely, I have heard little about the product that I recently purchased from your company.

I am an avid shooter; I go to the outdoor range anywhere from 3 to 4 times a month. I usually fire about 100 rounds per weapon, which means about 400 rounds fired each time I go out.

My favorite pistol is my Ruger Super Redhawk 44 Magnum with 7.5" barrel (240 & 300 grain rounds). My other pistols include a Taurus 357 Model 669 with a 6.5" barrel, a Colt Double Eagle in 45 ACP, a Model P9, 9mm from Springfield Armory, and a Smith & Wesson 38 cal. Chief's Special with a 3" barrel (Lady Smith).

I was continually bothered by a very sore shooting hand every time out. I also would usually come home with blisters just below the web of my hand. All this has changed since I recently purchased the Hand-Saver Shooting Glove from Action Products, Inc. *Never* have I been so happy about making a purchase!

This shooting glove is truly amazing, it not only prevented the blisters, but after a very long day of shooting, my hand was not sore *at all*. The fit of the glove was another pleasant surprised. I have a very hard to fit hand, but the way the Akton® Pads are stitched into the deerskin glove makes the glove-to-hand and grip very comfortable. I always thought there was no shooting glove available with the feel, grip, *and* protection this glove provides. I was happily mistaken.

I wish to say THANK YOU VERY MUCH to everyone responsible for the design and creation of this product. I know you must have done a lot of research. You've made me a very happy shooter!

Thanks Again,

Mr. Gary Maples

P.S.

My wife (the "Lady Smith" is hers) loves her Hand-Saver Shooting Glove, too! Now we both can, as your package says, exhaust our ammo... not our hands.

I have recently attached one of your rifle pads to a 300 Winchester short Mag rifle. Before the pad, when I fired the rifle it was a violent, out of control shot. The pad absorbed the greatest part of the shock allowing hours of uninterrupted target practice without fatigue. The pad is esthetically compatible with the rifle and has formed itself around the stock nicely. In short, for me it is necessary to have the pad attached in order to enjoy shooting and maintain better control.

Thank You,

Michael D'Ambra
